Hi Phyllis,
Can you please post the following document to the ftp site and forward notification and links to the person identified below.
Thanks
Dionne

Hi Dionne,

Thanks for your reply, and apologies for the delay with mine.

My main interest at present is the closure and post-closure phases of Nanisivik, and two areas in particular:

1. Any research on the extent of contamination of the mine site and associated infrastructure. For example, I can't seem to get a clear picture as to whether the housing stock was unacceptably contaminated, or not.

2. Reports and discussions of alternative site and infrastructure uses: i.e. any proposals for a trades training facility to replace the mine; but also feasibility studies etc looking at moving Nanisivik houses to Arctic Bay.

Some specific documents were brought to my attention - would they be available through the NWB via the ftp site or otherwise?

- 2002 Phase II environmental site assessment Nanisivik Mine – Corporate author is Gartner Lee Ltd. (75 pages)
- 2002 Nanisivik Mine: closure and reclamation plan: Vol. 1 @ 100 pages author is Gartner Lee Ltd.
- Technical Review of 2002 Phase II Environmental Site Assessment and Human Health/Ecological Risk Assessment, Nanisivik Mine – EBA Engineering Consultants – 29 pages

If you would like to discuss further over the phone, I can certainly give you a call this week.

Many thanks,
Tee

Hi Tee,
I did not have any previous direct connection with Nanisivik but I have been with the NWB since 1995 so I am familiar with the project.
There is a lot of information for Nanisivik that this not on the ftp site because it is a closed mine site. But I can probably pull some information together for you can send but I may take a while to put together. It might help to further understand the context of the information you need so I can narrow to field of information.

Maybe give me a call at the office next week I am in the office tues-Friday.
Regards,
Dionne

Hi Dionne,

Thank you for getting back to me.

I have managed to locate certain of the Nanisivik materials on the ftp site, but I'm not sure that I have them all. Is there a way by which you could point me to the location of all materials relating to Nanisivik, that the NWB has?

I think I was mistaken in my last email sorry, did you previously have any direct connection to Nanisivik?

Thank you,
Tee

Subject: Research on the Nanisivik mine and Arctic Bay

Hi Dionne,

My name is Tee Lim and I am a graduate student at the University of British Colombia, supervised by Professor Frank Tester. Arlene Laudrum at SRK Consulting suggested I get in touch with you regarding my thesis project, which is looking at some of the initial rationale for the Nanisivik mine, and what the mine's various implications were for Arctic Bay.

I was wondering if you might be able to direct me to the Nanisivik materials on the NWB ftp site, as it is a bit tricky to navigate? Also, Arlene thought you may have some insights regarding Nanisivik, as a former community liaison?

Thanks and regards,
Tee
