Hi Bruce,

Just wanted to email you in regards to the Polaris Mine Site.

Please note that the Nunavut Water Board has been CC'ed on this email.

The last time we communicated, you had passed along the proposed future monitoring plan for Polaris with the expectation that the subsidence report would be forth coming about four to six weeks later. We would like to thank you for that.

However to date we have not heard from you in regards to the subsidence report. About 8-10 weeks have now passed.

In past communications we (Water Resources Division) agreed that we would scan the two reports at a general level before you submitted them to the Nunavut Water Board.
At this time the Water Resources division feels that we do not need to see the subsidence report in advance of a water license application being made to the Nunavut Water Board. We intend to make a formal submission during the licensing process should the NWB call for comments.

Since 10 months have now passed since the expiry of water license #1AR-POL0311 we think at this time that it would be best to acknowledge, to the Nunavut Water Board, which way Teck Resources plans to keep an active water license for the Polaris Mine Site.

We encourage you to start the process for obtaining an active water licence as soon as possible.

Regards,

Ian Parsons and Andrea Cull
