To whom it concerns,

I hope in the future that the regulations outlining the amounts of toxins allowable can be reduced lower than already regulated. This will greatly improve the overall health of the affected ecosystems in or near these contaminated sites while deterring any further problems from developing in the future.

I also hope to see that much stricter regulations and penalties are adopted in the future to further deter any problems for toxins being dumped in Nunavut waters and on lands by anyone.

0 tolerance is best!

Regards,

Troy Beaulieu
