Hi Sean,

That is correct, we are looking at starting the Iqaluit Metal Dump project in the summer of 2013. We are anticipating 4 years to complete (2 years for construction and two additional years for monitoring) based on the remedial action plan.

Regards,
Mike

Hello Mike,

As a follow up to the telephone conversation we had about two weeks ago in which it was stated that the water licence for the Iqaluit Metal Dump Remediation Project is required for year 2013 rather than 2012, would you be able to confirm the required change in writing; an email will suffice.

Regards
Sean
