Good Morning Phyllis

Spring has sprung and the water is flowing.
We are wishing to discharge the contained water to the environment.
I have batched this amount of water in steel tanks, drawn samples and received results back.
This email is a copy of the lab report for this batch.
I have sent them to INAC and am sending a copy to you for your records.
This water will be discharged through an active carbon filter onto city land to the west of Nunatta property.
All water we discharge will pass through carbon filters regardless of Lab. results as pump and hoses may contain small amounts of hydrocarbons.

JIM

Your sample results are included in the attached certified report.

In an effort to improve efficiency and reduce waste, this electronic final report will not be followed by a mailed hard copy report. An electronic invoice will also follow by email to your attention unless an alternate address has been previously provided.

If you are experiencing any difficulties with our electronic reports, or have any other comments or questions about us going paperless, please let us know now so that we can resolve any issues.

Thank you for using Paracel.
