CAUTION: EXTERNAL

Hello, Jennifer.

In regard to Kelli's email below, we are looking for additional information to evaluate how the increased fuel storage may affect the project certificate and monitoring. Specifically, we need that additional information submitted to the online project dashboard (application number 125253) on the following areas:

1. More detail on the methodology in AEM's self-determination this represented an insignificant change;
2. What changes to the trucking/transport schedule are being proposed, including:
    a. Changes in volume of trucking during intervals when refueling the large tank is being conducted,
    b. Potential changes in dust generation due to a potentially more intense trucking

interval, and
   c. Potential changes in employee job schedules (re trucking), if any;
3. Construction schedule for the new tank (ie, how long to complete and commission);
4. Any changes in employment due to construction/operation; and
5. Any changes to marine shipping or overall quantity of fuel brought into Baker Lake during sealift.

We look forward to receiving the requested information so we can proceed with the evaluation.

Subject: RE: Operational Update - Additional Fuel Tank at Meadowbank Mine

Good Afternoon Jennifer,

Thank you for your notification to the NIRB Re: Modifications to Fuel storage amount; however, the NIRB has some questions it would like to have addressed prior to next steps related to the Project Certificate. For this I am handing the management of this application over to Keith Morrison. Manager Impact Assessment and he will provide you with more guidance on the questions the NIRB has.

And the NIRB would like to note that the NIRB does not accept any links for plans and they must be uploaded to the Meadowbank application No. 125253 to be accepted by the NIRB.

I will let Keith continue the correspondence for the Fuel Expansion and I will continued to be cc'd along with Emily and Caitlin.
Kelli

Subject: Operational Update - Additional Fuel Tank at Meadowbank Mine

Good afternoon,
Please find attached letter to inform the NIRB of an operational update and associated monitoring regarding the addition of a 3.3 ML fuel tank at the Meadowbank Mine. As outlined in the attached letter the application was submitted to NPC on May 26 and the NPC concluded on June 22 (below and provided in attached letter) that the proposed changes were exempt from screening by the NIRB as the additional fuel tank does not change the general scope of the original or previously amended activities.

The updated Spill Contingency Plan and Bulk Fuel Storage Plan are provided at the below links. Please let me know if any issues with accessing these files.

Thank you,
Jen
