---

Hi Sean,

Please find the attached portion of the Draft AEMP Framework. I am sending the contents of the entire document in 5 different emails so that the NWB will be able to accept the file size. The main body of the Draft AEMP Framework is contained in this email along with the first Figure 2.1. Subsequent emails will contain the remaining Figures and Schedules that are named according to the Headings within the document.

As a reminder, this document was drafted based on the information presented by Baffinland at the AEMP Workshop held by Baffinland on November 13, 2012, and builds on comments received from agencies. Additionally, minutes produced from the workshop have indicated where agency input is still required to build on the Draft AEMP Framework as we move through the process.

I would offer to your agency that Baffinland can put the entire document on an FTP site that agencies could easily access with internet speeds in Iqaluit and other cities where the agency resides.

Please let me know if you have any questions.

Regards,
Oliver
