Good afternoon,

The Nunavut Water Board acknowledges receipt June 6, 2021 of the updated adaptive management plan, copy attached.

The NWB requests that CIRNA provides whether the submission satisfies CIRNA's recommendation that "*[Agnico Eagle] either revise its WRSF design plan by applying a 7.0 meter thermal active layer depth, or revise its [Adaptive Management Plan]by applying a 4.7 meter thermal active layer depth, or substantiated the following statement with sufficient evidences or data: "(E)ven if the active layer depth of 7m is reached during the operation, closure or post-closure phase, it is not expected to have adverse effect on the WRSF water quality."* CIRNA is requested to submit its response on or before **Wednesday, June 16, 2021**.

Regards,

Richard
