Hello Mr. Carr,

I was reviewing your application for Water Licence. These following small deficiencies should be addressed before the application package goes for the third parties review:

- The most recent licence Application form should be used. Those forms are available at the NWB ftp site at following link: ftp://nunavutwaterboard.org/ADMINISTRATION/ (User name: public; Password: registry);
- The project extents general coordinates and water sources should be identified with the Application and Camp Questionnaire as well;
- The Item 1.4 of the Spill Plan's Table of Contents refers to North Arrow Minerals Inc. Environmental Policy. The relation between the applicant (Bitterroot Resources Ltd.) and North Arrow Minerals Inc. should be clarified;
- Regional and Detailed Property Location Maps are indicated as being within the Appendix 2 of Spill Plan. However, no maps are included;
- The Abandonment and Restoration Plan is indicated (Item 38 of Camp Questionnaire) as being the Appendix III. However, no Abandonment and Restoration Plan is included with the application package;
- A recent financial statement of company should be included within the application package as well.

It was also noticed that NPC conformity determination and NIRB screening decision are not made for this project.

Regards,

Karén Kharatyan, Ph.D
