Hi Phyllis,
The NIRB recently completed a NLCA 12.4.3 exempt from screening for AEM's IVR exploration file (NIRB File 11EN010) project proposal. This exploration project is proposed to be conducted approximately 50 km north of Meadowbank on Inuit owned land; see attached letter for more details. The new exploration project proposal indicated that AEM's current revised water licence would cover drilling activities within this new area (NWB No. 2BE-MEA0813). On August 29, 2012 the NIRB was cc'd on the email below in regards to AEM's renewal request for their water licence. I've reviewed their renewal application with NWB and it appears that they are renewing their water licence for their Meadowbank exploration project only and does not refer to the IVR exploration. The coordinates referred to in the renewal licence does not extend beyond the Meadowbank mine site and only refers to the Meadowbank exploration site. Basically, the renewal discusses the use of water for drilling activities but appears to only refer to the Meadowbank exploration site and not to the IVR site. I wanted to point this out to you as AEM indicated to me that all their exploration activities would fall under this water licence but it appears that they did not include in this renewal.

Regards,
Sophia

The appendix A is only the permit list.

In the original document, there is a presentation page (ex: appendix A), before the permit list….
The next time, I will include all the document in just one pdf, that will be easier.

Regards,

David

Hi David,
The NWB application refers to an Appendix A and to 2012 AANDC inspection report. These attachments appear not to have been included in the email – could you forward a copy of these two documents.
Thanks,
Sophia
