Hello Karen,

At this time the file cannot be closed. Our Field Operations Unit will need to reconfirm that no activities occurred at the site coordinates for the CNA project.

A representative from our Field Ops Unit will be able to reconfirm if another on-site inspection is required. I have cc'ed Field Operations A/Manager Andrew Keim.

Regards,
Rory

Rory,
I meant the August 6, 2011 Inspection.

Hi Rory,

The NWB was trying to close the 2BE-CNA0608 file. You provided comments with respect to this cancellation/closure application advising not to cancel/close the file until the Water Resources Officer completes an on-site inspection.
Just for your information: A ANDC Inspection was completed on August 6, 2001 (Inspection Report is attached to the Cancellation application). This report indicates that *no camp or activities occurring at the coordinates provided in the expired licence*, and the Inspector's direction was *"…otherwise the proponent should apply to the NWB for a cancellation of the licence in order to close the file"*.

Could you confirm that the AANDC shall again conduct an on-site inspection for this site?

Regards,

Karén Kharatyan, Ph.D
