Hi Phyllis,

We are transmitting two drawings for construction (in two e-mails) which were recently completed by Hatch and signed/stamped by a Professional Engineer registered in Nunavut as required under Part E, Item 4 of the NWB Licence No. 8BC-MRY1314. These drawings include the site preparation works at the Mine site, specifically:

- Drawing H349000-4134-10-035-0001 Mine Site – Accommodation Camp – Earthworks and Drainage – Plan
- Drawing H349000-4134010-035-0002 Mine Site – Accommodation Camp – Earthworks and Drainage – Sections

The location of the Mine Site camp accommodation pad has been revised from the submission of the drawings for the Type B permit application (of 11 March, 2013, drawing H349000-4134-10-015-0001 rev A) due to the presence of unstable geotechnical conditions (ground ice) at the original location. The accommodation camp pad
was relocated to a geotechnically more stable area straddling the existing Tote Road, east of Sheardown Lake. Please note that this is not an expansion of the proposed facilities; it is simply a relocation.

Please do not hesitate to contact the undersigned should you have any questions, comments, or require any clarification.

This transmission is also copied to QIA under Section 6.01 of Commercial Lease No. QI0C3001.

Kind regards,
Jim
