---

Hi Phyllis,
Revisions to the application for the new wishbone-malley water license (submitted Dec 21 via email) has had some affect to the amendment request to the George license (submitted Dec 2 via email). I have revised the application accordingly and request that you replace the application submitted in Dec 2011 with the attached; the hardcopy will be sent via xpresspost. Application fees were submitted with the original version of the application.

For your convenience the pages that have changed are:
summary has been revised to reflect the 175m3/day requested

location map revised to reflect revised requested boundaries

application pg 1 - section 4 change to the new amended coordinates to minimize overlap with other areas described in water licenses and still ensuring coverage of Sabina claims. I'm in the process of preparing Goose amendment and will submit in the next few days.

application pg 4 - section 9 change to the volume of water being requested from 297m3/day to 175m3/day

application pg 7 - section 13 outlining the requested water volume change to only reflect changes in camp and addition of other water use/waste deposit

Appendix A - the mineral tenure list has been updated to reflect only those claims and leases that work will occur on
under this water license amendment

SIG section 27 - reflects revised water volume

If there is anything else, please contact me.
Elizabeth
