Hi Shawn -

Thanks for your quick reply. As there are no changes to your project, so long as no additional or revised permits/authorizations are required, we will not be required to get involved.

If you are being reprocessed by the NWB however, we will likely need to issue correspondence to them confirming that the original screening decision continues to apply - we will await a formal request from the Nunavut Water Board before processing that however.

Cheers,

Amanda

Amanda Hanson

Hi Amanda

Many thanks. It is true, this is a contination (and completion) of last year's project, with no changes. Just a reduced season for 2013.
I sent this in as I was not sure if last year's NIRB license/approval had expired; we need to be reprocessed by the Nunavut Water Board, for instance.

But yes, just to confirm: our activities are the same as 2012 May, meteorological and snow measurements on the glacier. We will complete this work and remove our stations.

Let me know if you need any further information.

many thanks,
Shawn

Hi Shawn -

I'm following up to your email below which included additional application materials and the email which noted your project activities were remaining the same as were initially applied for.

Unless I am missing something, I'm not sure why you're applying with the NIRB again? Could you please confirm whether the details within your prior application remain the same (not withstanding any restrictions in activities planned) as were previously screened by the NIRB (see pg. 7, Appendix A in the attached Board decision).

Thanks,

Amanda

Dear NIRB folks,

You kindly supported my research last summer, glacier-climate studies on Ellesmere Island.
We are hoping to go in this May (2013) to complete this project, collect our data, and remove our weather stations.
We have our NRI permits in place (many thanks, Mosha), but I need to confirm that this is OK with NIRB and NWB. i.e. to renew each of these licenses.

This is not a new project, so the project description remains the same as last year. We do, however, have more limited activities this coming season, so I have revised the NIRB permit application, as attached. In summary, plrease find attached:

- the 2013 NIRB permit application
- translations from last year's application, which should hold as the project description is the same - our dates have changed and we are a smaller crew
- 2012 progress report (english and translation)

Please let me know if you need anything further, best wishes, Shawn

Dear Mosha Cote:

Please note that the Nunavut Impact Review Board (NIRB) has completed screening University of Calgary's "Glacier-Climate Studies" project proposal (NIRB: 12YN016). The Notice of Indication and Screening Decision Report for this file are attached for your review.
