This is to acknowledge receipt of your ***Annual Summary Report*** on the project "Glacier Mass Balance and Pollution Studies in the Canadian high Arctic", license number **02 003 12R-M** granted on January 04, 2012.

NRI appreciates the information you have submitted. Your report will be placed on file at NRI and copies of your report will also be distributed to those agencies that were involved in the licensing review process for your project. Your report will also be a welcome addition to the NRI database.

The NRI database is used to assist in replying to public requests for information, and to provide information to other researchers who may wish to undertake similar projects. We hope that sharing information will help to foster growth in Northern science and increase awareness of the value of research to Nunavut residents.

We look forward to receiving a copy of the ***Final Report*** on your project, whether it is a paper, thesis, or other publication. Electronic copies in Microsoft Word or Adobe PDF would be most appreciated if you would like posting or referencing of your report on the NRI web site (www.nri.nu.ca).

In closing, we trust your research experience in Nunavut has been positive and ask that you please encourage your colleagues to contact NRI if they intend to undertake a research project in Nunavut. We look forward to assisting them in obtaining proper approvals from community agencies, Designated Inuit Organizations for the Nunavut Land Claim and government regulatory bodies.

Regards,

Mosha Cote
Manager, Research Liaison
