Subject:	Lupin Mine Tailings Pond Syphoning
Date:	Saturday, September 08, 2012 5:54:07 PM

Hi Eva:

Please be advised that we have begun the syphoning from the Tailings Pond as of today's date. We will continue to measure for pH throughout the tailings pond during the syphoning process, and collect the required samples at the frequencies outlined in the licence.

Patrick / Tim:

I understand you may want to come to site during this syphoning. Do you have any idea as to your schedule for this site visit?

Cheers,

Dave.
