Hi Karen

The numbers in the amendment application represent the estimated water quantity to be withdrawal from Third Portage Lake and Unnamed Lake for each purpose (mill, camp and emulsion plan). These numbers don't include any contingency or are not rounded as it was the case in the letter application. For 2013, AEM planned to collect 1,660,504 m^3 of water from Third Portage Lake and Unnamed Lake. This number has been rounded to 1,700,000 m^3 because of the emergency of the situation and a contingency of 10% was applied. So the real amount of water that could be withdrawal in 2013 was 1,870,000 m^3 as asked in the letter application. For 2014-2018, the estimated quantities to be withdrawal in the amendment application totaled 1,132,400 m^3. This amount was simply rounded to 1,150,000 m^3 in the application letter. This small contingency was applied to 2014-2018 water quantity as AEM should not have any problem of reclaim water in the future, so the amount of freshwater to be withdrawal should not vary too much.
It was an AEM mistake not to put in the letter and the amendment application the same amount of water to be withdrawal. In summary, AEM is requesting an amendment to NWB License 2AM-MEA0815, Part E, Item 3, to permit the withdrawal of 1,870,000 m^3/yr in 2013, and 1,150,00 m^3/yr for 2014-2018 for domestic camp use, mining, milling and associated uses.

Source	**Withdrawal (m^3)**	
	2013	**2014-2018**
Third portage Lake – Mill	1,608,104	1,080,000
Third Portage Lake – Camp	50,000	50,000
Unnamed Lake – Emulsion Plan	2,400	2,400
Total amendment application	***1,660,504***	***1,132,400***
Total letter application (with contingency)	***1,870,000***	***1,150,000***

If you have any other questions don't hesitate to contact me.

Hi Stephane,
How are you?

I notice that there are different set of water use numbers in the amendment application and associated letter. Especially for the 2013 the difference is significantly higher in the letter (1,870,000 m^3/year) as opposed to the one in the application (1,658,104+2,400) m^3/year. For the 2014-2018 the letter states 1,150,000 m^3/year and the application has (1,130,000+2,400) m^3/year.
Could you please clarify.
