Subject:	Fire at Meadowbank early this am
Date:	Wednesday, March 13, 2013 8:28:07 AM

Good Morning,

This is to advise you that there was a serious fire early this morning at the Meadowbank Gold Project. The fire occurred at a maintenance coverall. The cause is under investigation at this time.

No runoff migrated off the site to any freshwater source and any petroleum products affected were consumed in the fire. A small amount (app 60 – 80 Liters) of oily water flowed out of the building but is contained (now frozen). Clean up activities will be conducted throughout today and the rest of the week.

Should you have any questions feel free to contact me.

Regards,

Kevin Buck
