Hi Phyllis

During a recent joint meeting with Hamlet Council, HTO, Igloolik Mary River Committee and Baffinland Iron Mining Corporation held in Igloolik, we were updated and discussed the next steps involved in the review and permitting process for the revised Early Revenue Phase of BIMC proposed project.

We are also aware that the NWB will be holding a hearing in Pond Inlet on April 23-25 concerning their water license application. During the meeting Council, along with the other community organization representatives, expressed the need and importance for Igloolik to be represented at these hearings

As a result of this concern, I am writing to inquire if the NWB can provide funds for Igloolik to send 3 representatives to Pond Inlet so they may participate in the hearings and maintain their understanding of the issues involved as Igloolik has always been a key stakeholder and participant in the entire review process of the Mary River Project.

We look forward to your reply, and please do not hesitate to contact me if you have any questions or require additional information. If you are not the appropriate person to address our concern, please forward it to the correct person in the NWB so it can be properly addressed.

Thanks in advance,

Brian Fleming
Igloolik, SAO
