Dear,Louise:
Sorry I,will take few day in respond to you the water issue in meliadine camp “it is a very important matter to KIA”
Unfortunate the NIRB is in Rankin this week in preparation for the kiggavik project environmental review.

Input in reporting to NIRB prosess is one of the more importan legal obligation for aur land departament my department are working fully in this project to be well prepare because we representing inuit of kivalliq region in behalf of Kivalliq Inuit board of director's plus all our consultants also are traveling no having yet the oportunity to discuss matters fron the report with them.

I will request some time to respond to the report and a respond letter in regard to KIA position after 3 years having this issue. I'm confident that everything will work out I wan to meet with my inspector and water officer to make sure they are fine with the report and I'm sure we can resolve all the issues in our pending meeting with AEM regarding all oncoming work in the property as well the lands quantum use and the last 3 years before we enter into the commercial lease I'M sure you are well aware of that meeting cancel because of the storm.

Thanks for all way do the due diligences to be all ways proactive in you reporting that show that commitment of the AEM to work together with Inuit in the melding project

Regards,

Luis Manzo P,Ag.

Dear Louise:

Find attach a letter in regard grey waters from the Meliadine main camp KIA in several number of time has been requesting the correction of the grey water discharge point MEL: 7 to be corrected since 2010 before this scalded
Please can you take some action in this matter I will appreciated anything you can do.

I do authorize the transfer of full tanks by a letter of agreement I also
