Hi Christine,

See my reply message below sent to you (cc-ed to Phyllis) once I got back to work from annual leave on May 28, 2013.

Thanks,

Hi Christine,

I couldn't reply to your request as I was away, just returned from annual leave.

I can't tell you anything about the "temporary facility". However, the construction and operation of a landfill as a mean of non-hazardous waste disposal was approved by the Board on September 10, 2012 (Amendment 4).

With the issuance of this Amendment the Board approved the AEM "Landfill Design and Management Plan" dated April 2012. According to this Plan the proposed location of landfill was to the east of Lake B7, for four year life time (June 2012 to June 2016).

With respect to the Open burning: actually the Part D, Item 2 of licence states plastics, wood treated with preservatives, electric wire etc. to not open burn. I believe at that time the Board wasn't putting the general open burning prohibition condition. So from my understanding, they are not really prohibited to open burn clean wood products?

I hope this helps.

Cheers,

Karen, would you please review the 2BB-MEL0914 file and provide a response back to Christine.
Thanks.

Subject: 2BB-MEL0914 Open burning/ landfill

Good afternoon,

I am reviewing the Landfill Management Plan submitted by Agnico-Eagle for my up coming inspection and am confused. I was at the site in July of last year and it appear that a Landfill has already been established for some time. Materials have been placed at N 63 01 24.5 W 92 10 53.7 (NAD 83) but the plan is to construct a facility 2.3 km away from this site.

I need to know as soon as possible if this "temporary" temporary facility was approved and I am just unaware of the letter. Also if this facility was approved could I be directed to the letter which allows for open burning.

Please note the Landfill/ recycling/ burn area I noted during July 10th, 2012 inspection is poorly constructed and unlined. I wrote in the 2012 report the activities of open burning would cease til approval is provided to the Inspector from the NWB.

Thanks for your assistance, greatly appreciated as always,

Christine
