Thank you Richard,

Attached is the slightly revised record of inspection (changes are initialed): I added "Auclair" to top line for Josee and inserted "10" as number of on-site staff, as per your email -thankyou. Please note a copy of inspection record will be sent to the NWB and a copy has been provided to the QIA at their request.

I wanted to follow-up with you regarding the spill that occurred and perhaps provide some clarification: I have not yet received the initial spill report from the Spills Line. Can you please resolve this in the next day or so. As per your water licence (Part H, section 5c) and the copy of the record of inspection you have, you are expected to file the *follow-up* report (not the initial spill report) within 30 days of the occurrence.

You need to be aware that the initial Spill Contingency Plan filed with the NWB was not approved (the 2009 submission) and requires re-submission (as per Part H, section 1). I will require you to revise and resubmit this Plan within the next 30 days to the NWB. Please "cc" me when you do.

Under Part I, section 1 you are required to submit an addendum to the Plan already provided, in regards to information on seasonal closure and temporary shutdown procedures: as this information was also requested during the inspection, this will fulfill both requirements once completed. August 31/12 should be a reasonable to date to get this in.

Please go over the terms and conditions of your water licence, it will assist you in this process, and ensure that the complete water license (and land lease) are available in hardcopy on your site.

If there are any questions or concerns with this information, please give me a call (or send an email) and I would be happy to discuss.

Many thanks,
Melissa

Hi Richard and Josee,

Just a quick question I missed: how many staff do you have on site please (or typically have on site)?

Thank you,
Melissa
