Subject:	RE: 120823 2BE-FER0712 Renewal Application Deficient-OMLE
Date:	Thursday, August 23, 2012 11:15:01 AM

Phyllis,

Thank you for your message.

1) Starfield Resources with the help of Rescan is making every effort to prepare the subject Annual Reports. We have had to begin from "square one" and it has taken time to obtain some of the needed information.

2) Starfield Resources, again with the aid of Rescan, will prepare and updated Abandonment and Restoration Plan.

3) Please provide us with the form letter to authorize Rescan to act on behalf of Starfield Resources.

Be advised, that Starfield Resources opened the Ferguson Lake camp only to undertake needed maintenance and reclamation/remediation work. This is being done by a small group of people for one month; the water usage is therefore minimal and there will be no exploration work undertaken during the 2012 field season. This work has to be undertaken before bad weather arrives. We do not have a choice in the matter, if we are to comply with other regulatory agencies in Nunavut.

Sincerely,

Ray Irwin
V.P. of Exploration
Starfield Resources Inc.

Subject: 120823 2BE-FER0712 Renewal Application Deficient-OMLE

Good day all:
Please be advised that the above application, received on July 12, 2012 remains deficient. We are unable to continue processing this file until such time as our office has received the following documents:

1. Annual reports for 2007, 2008, 2009, 2010 and 2011 (I understand these are being worked on by Rescan)

2. Revised/updated Abandonment and Restoration Plan (refer to Part I, Item 1 of the attached licence)

3. Authorization letter for Rescan to act on behalf of Starfield Resources Inc.

Once the issues above have been addressed the NWB will continue processing the file.

Please note that the expiry of the current licence was July 1, 2012. Operating without a valid licence is in contravention of the Act.
Regards,

Phyllis Beaulieu
