---

Hello Ms. Chadwick,

A submission of a Revised Final Restoration and Abandonment Plan (dated June 20/11) was found on the NWB's ftp site. It addresses some of the concerns presented in the 2010 water licence inspection report, namely the lack of details from the final camp clean-up activities in 2008. As well, based on communications with the Resource Management Officer who closed the Land permit, it seems an error was made as to the camp location (these photos are attached for your records).

Based on the site photographs taken in 2010 by myself (enclosed for your reference), there remain outstanding issues with respect to the camp closure under the water licence. If outstanding administrative issues have already been addressed, please ensure that this is communicated directly to the Inspector(s).

Thank-you,
Melissa
