Subject:	Re: 2BE-IZO0712 Renewal Licence
Date:	Tuesday, December 04, 2012 9:25:09 AM

Hello Karen,

We have had an internal meeting to discuss, and would like the following comments to be applied to ALL renewals (not just for 2BE-IZO).

We would like to clarify that we do not require 10 days notice before drills are moved or water source is changed. However, the proponent does need to identify the water source before drilling activities commence. They should be able to provide at least 10 days notice for their overall general drill program, and we would expect changes to occur adaptively throughout the season, but they should already know where their water is going to come from.
What we would like to have incorporated into the licence(s):
-Providing All locations of water sources, sumps and drill holes (in the Annual reporting or provided to Inspector on request) and in the form of NAD 83 coordinates (UTMs not acceptable).
-In terms of monitoring, they need to record the volume used at each source (and number of holes drilled) AND as they currently are not doing a very good job of measuring or monitoring draw down, we would like additional monitoring of the source in the form of before/after photos of each water source used (this is to be included in the Annual Reporting). This would provide a visual record of the water source and hopefully motivate the proponent(s) to select their water sources more carefully.

Other:
-The Inspector on this file (Eva Paul) may have some additional comments to provide on this specific renewal.
-Water Resources is working on standard comments/conditions that would cover what was discussed, so that the information coming from our Department is consistent.

Hopefully this helps; please give me a call to follow-up for any questions or concerns.

Best regards,
Melissa

Good morning everyone,

I hope my preferred Inspectors are doing well.

I am working on 2BE-IZO0712 renewal licence and have a quick question to you. The statement about Non-compliance Items shall be included with the Decision, and I will also attach the July 2012 Inspection Report. I was wondering to include this condition as well:

> **The Licensee shall provide a notice to an Inspector and the Board that includes the coordinates of each water source used for the purposes outlined in Part C, Item 1 at least ten (10) days prior to using the water source.**

Please advise whether or not you are ok with this condition? Do you think this information is practical to process for you and wouldn't be excessive?

Regards,
