Good morning,

As we prepare to start the 2013 field season on June 10, I would like to provide a more definitive summary of the upcoming activities. Ground gravity geophysical surveys will be conducted on the Caribou, Igloo West, and Jane Extension as indicated in the attached maps. There will be a total of 411 km of line (2,819 gravity stations along 137 km, 137 km of VLS-EM, and 137 km of Magnetics). The drilling activities will be similar to previous years. Three drill rigs will be used to drill approximately 8,900 m. The proposed greenfield drilling locations are the Kiggavik East, Kiggavik North, Kiggavik South West, PIZZA Grid, and the Jane-Drew Corridor. The brownfield drilling portion will include two drill holes on the Endgrid deposit (North pod) and two holes on the Bong prospect. Activities will be conducted in accordance with the licences and permits indicated above.

If you have any questions or comments, please don't hesitate to contact myself or John Robbins at John.Robbins@areva.ca or (306) 343-4513.

Thanks,

Naomi Stumborg
