Subject:	Update - Kiggavik Artesian BONG-062
Date:	Saturday, July 13, 2013 8:33:12 AM

AANDC Permit #: N2009C0017
NWB Licence #: 2BE-KIG1318

All,

I would like to provide an update on the BONG-062 drill hole (14 W 7144062 562229) that previously intercepted artesian at 282 m on July 6. The hole was completed today (July 13) at a depth of 369 m. No mineralization was intercepted, a plug has been placed, and we await the water analysis results from the sample taken July 6.

If you have any questions, feel free to contact myself or Brad Pohler.

Thank you,

Naomi Stumborg

All –

An artesian was encountered at BONG-062 (14 W 7144062 562229) at 8:30 pm this evening (July 6). The depth reported was 282 m with an initial flow rate of approximately 40 L/min. A water sample of the artesian has been taken.

Further updates will be provided as the drilling progresses.

Have a good night,

Naomi Stumborg
