Subject:	Sabina Fuel Cache "Wishbone 1" and "Wishbone 2"
Date:	Tuesday, May 01, 2012 10:35:46 AM

Good Day,

Please be advised;

Cache: “Wishbone 1”

As per term 31(1)(k) of Crown Land Use Permits, this email is to advise you that a fuel cache has been established at 107°58’53.3”W and 65°43’08.5”N to support exploration drilling activities in the Wishbone Project area. The cache includes up to 20 drums of diesel fuel within secondary containment located more than 30m from local waterways. The cache will be monitored on a regular basis during the 2012 drill program and when drilling is completed in the area, the remaining drums and containment will be transported back to George camp. Progressive reclamation and monitoring activities will be completed as needed.

Regards,

JCM
