Re: Pumping of Ocean View Sump Water

The Nunavut Water Board (NWB) would like to inform DIAND Inspections that an amendment to Licence #NWB1NAN9702 is required for activities outlined in Nanisivik Mines Ltd's letter dated July 2, 2002 on the pumping of Ocean View Sump Water. Under Part D, Item 14 of Amendment 1 issued on December 9, 1999, "all accumulated pit water is to be directed to a sump and backhauled to the East Adit Treatment Plant prior to final discharges."

Please be advised that an "Amendment" means a change to original terms and conditions of this licence requiring correction, addition or deletion of specific terms and conditions of the licence; modifications inconsistent with the terms of the set terms and conditions of the Licence;

Nanisivik Mines Ltd. is required to submit an application for amendment, including:

- cover letter;
- summaries in English and Inuktitut;
- the capacity of Ocean View Sump;
- the volume of discharge to the Ocean View Pit to the Sump;
- Surveillance Network Program data and analysis at Station 159-18 (Run-off at Ocean View Open Pit) and Station 159-19 (Pit Water at Ocean View Open Pit); and,
- thirty (30) dollar application fee.

Please inform the Applicant of their need to file for an amendment request immediately.

Sincerely,  
***Original signed by:***

Dionne Filiatrault  
Sr. Technical Advisor
