Subject:	2BE-PBP1115 Amendment No. 3 Application
Date:	Thursday, April 04, 2013 3:23:51 PM

Hello Dwayne,

The Nunavut Water (NWB or Board) has conducted a preliminary technical review of the above-mentioned application (Application), received by the Board on March 12, 2013 for the Pistol Bay Project, which is located within the Hamlet of Whale Cover, Nunavut. The review determined that the following items must be addressed before the application could proceed to the next stage(s) of the review process:

1. The 2012 Annual Report for the licence associated with the Application was not filed with the NWB and therefore is not available for review;

2. The cover letter accompanying Application states that the amendment request is for an increase in daily water consumption. However, the supporting information provided with the application indicates that the scope of the amendment may need to include new additional claim blocks that have been obtained for the project; and

3. The cover letter accompanying the Application states that an increase in water use, from 120 to 200 cubic metres per day, is requested; however, page 6 of the amendment application states that the amendment request is for increases in water consumption from 120 to 200 cubic metres per day for drilling and from 1 to 2 cubic metres per day for camp use, 2 cubic metres more than amount stated on the cover letter. Confirmation on exact quantity of water required under the amendment application is required.

Should you have any questions, please do contact the undersigned at your earliest convenience.

Regards,

Sean Joseph
Technical Advisor
