Hi Phyllis,

In answer to your question a) below, please note the following revision to our application, regarding camp waste.

Non-hazardous waste - incinerator ash, non-combustible waste, and wastes prohibited by regulations from being incinerated will be collected, sorted, and shipped to a licensed waste disposal company for proper disposal and tracking according to regulations.

Hazardous waste - hazardous waste such as waste oil, contaminated fuel, antifreeze, and any other materials will be sent to a licensed waste disposal company for proper disposal.

The contractor for both of these wastes will be KBL Environmental of Yellowknife, NT. We are currently working out arrangements and applying for a Waste Generator Number for tracking. Therefore, municipal landfill sites in Nunavut will not be used for waste disposal.

I have two questions for you:
- do I need to revise the permit renewal application to reflect these changes or is this e-mail notification sufficient - that it can be amended and put into the permits as a condition?
- do I need to provide you with written documentation from KBL that they are undertaking this service for Cameco, or by following the regulated processes of using this service, is that sufficient proof?

Regards,

Gerard

Subject: Requirements for Renewal

I am in the process of preparing your application to go out for our 30 day review. The technical advisor assigned to this file has requested the following information that will be required and that can be submitted now so as not to hold up the file any longer.

a) Please provide a letter from the Municipality and/or hazardous waste disposal site indicating their permission to accept your waste, and types of waste to be deposited there.
b) Provide a topographical map for the proposed Aberdeen camp
c) The spill plan should contain a map/site plan (containing relevant detail) for the proposed Aberdeen camp.

d) In the supplementary questionnaire, question 3, you have existing and proposed camp location on the same claim block, based on the maps provided they appear to be on different claim blocks (K03758).

Regards,

Phyllis Beaulieu
