Date: Tuesday, May 08, 2012 1:26:49 PM

Hi Phyllis,

I apologize for the delay however there are going to be some small amendments to the application as the land use area for the bulk sampler portion of the application has been identified as being "municipal land". I have been trying for a better part of a month to get the person that I originally spoke with at the CG&S to answer me back on what needs to be done as far as the application process but they do not answer my emails and their office never seems to answer the phone when I call.

I will try again today to contact them so I can get clarification on the process and get back to you with the additional information that will be needed for the bulk sample part of the application and renewal portion of the application as well.

Thanks for your patience,

Nicole

Subject: 2BE-QIL0712 Application for Amendment - Requirement for documents

Importance: High

Dear Nicole – based on the information provided in the above application it has been determined that this is an amendment/renewal as opposed to just an amendment. Due to the fact that bulk sampling is now part of the project there will be a requirement for further NIRB screening as well. Please resubmit the application form previously sent to you on April 11, 2012. An updated spill plan and AR plan will also be required to reflect the new scope of activities. Once these documents are received we will continue our preliminary technical review.
Regards,

Phyllis Beaulieu
