---

Hello Christine,

Unfortunately Vale will not be conducting any work on Southampton Island in 2013 and therefore will not have a helicopter in the area. So we are unable to provide assistance in that respect.

Thank you,

**Christopher Hicks, P. Geo.**

**Subject:** Final inspection 2BE-SIP

Good Afternoon,

I have received Vale's request for cancellation of there Water Licence; 2BE-SIP. Unfortunately I planned my charters for the inspections in the North East Kivalliq last month therefore I may be unable to complete a final inspection this field season without assistants.

Does Vale have plans to positioning a helicopter in Coral during the 2013 field season (any dates I may be flexible)?

I ask because I will be in the Kivalliq region numerous times this summer and may be able to fly over to South Hampton Island on a Scheduled flight and complete an inspection if a charter is available.

Thank you for your time,
