Hello Henry,

We had a crew in there last week to remove the tent floors, berms, outbuilding, remaining fuel etc.. There are still a few loads of old drill rods and misc gear down by the airstrip. We have contracted Ookpik aviation to go in a clean-out the last few loads in the next week or two, depending in the availability of their aircraft. I will let you know when they have taken-out the last of the loads. We will also prepare a closure report with photos for you.

Regards,

Stefan.

> The sno-cats went up May 27th and took out the bulk of the fuel (~120 drums). Our crew will head up to Baker Lake on July 23rd to begin removing the tent floors, building etc... Oopkik Aviation has been making trips up in the meantime, removing the remaining fuel by Turbo Otter. We are hoping to have the whole thing wrapped-up by August 3rd, weather permitting.

Good Morning,
Just looking an update on activities at the Itza Lake site (Titan Uranium's old site N2005C0040) regarding New LUP N2013U0006 Water License # 2BE-THE0813.
I will not be completing this years inspection but have cc'd the Inspector on the file.
I have highlighted the information below which was requested for this years inspection

>>> Christine Wilson 2/11/2013 4:21 PM >>>
Hi Phyllis,
Please see below in RED in regards to 2BE-THE0813; could you provide Mr. Kruse with directions.
I appreciate it. I will be out of the office from Feb 18 to Mar 4.
Christine

Hello Christine,

No problem submitting a remediation schedule for you. We are in the process of confirming dates for the Itza Lake Camp clean-up with contractors (pending approval from you office). As we have discussed before, there will be no exploration on the ground by Mega Uranium in 2013 since the claims and lease are now owed by NEXGEN Energy. The only work we intend on carrying out is removal of the existing fuel and camp at Itza. Once we have confirmed dates with contractors we can send you the summary of actionable items within the A and R plan and implementation schedule.

On the subject of the Water Use License assignment, this process has stalled because the NWB requested that we have an active Land-Use permit in place in order to process the assignment from Titan to Mega. As you are aware, the AANDC did not issue a land-use permit to Mega after we applied. Does the camp clean-up work require a Water Use license in place considering no water will be used? Please advise.

Best Regards,

Stefan Kruse.

Stef,

Could you reply to Christine (cc me as well).

Thanks

Michael

Subject: Re: Itza Lake Camp cleanup by Mega Uranium Ltd.

Good Morning,

I have reviewed all information submitted by Mega Uranium in regards to Itza Lake Camp and have a few follow up questions and requests.

Has assignment of the water licence been completed? As you know a water Licence is required for these activities. Please provide an update on the status of the assignment.

I request a submission of a work plan for the 2013 field season; A short summary of actionable items within the A and R plan and implementation schedule. This will ensure I schedule a final inspection after the work is done onsite and enable me to close this licence promptly following the inspection season pending the findings of the inspection.

Feel free to contact me at anytime so that I may assist this process. We appreciate the time you have taken to meet the requirements.

Tracey,

As discussed, please see the enclosed letter with attachments, regarding Mega's plan for the cleanup of the Itza Lake camp site, Nunavut.

Should you have any questions please feel free to contact Mike McNeill or myself.

Regards

Michael
