Good afternoon Laura and thanks for the email. I've ensured that both yourself and Rodney are on the distribution list for all future correspondence relating to the Nanisivik renewal. The process will be that once the preliminary review is complete on the file our office will be distributing a letter asking for a completeness check of the submitted application. All interested parties will have an opportunity to send comments in on the file. Your are certainly welcome to provide comments and attend any meetings that will be scheduled, whether it will be through a written hearing or an in person meeting in Arctic Bay. Regards,

Hello Ms. Beaulieu,

Thank you for your telephone message today outlining the status of the review process. From your call my understanding is that the application is undergoing a technical review, which could be complete as early as next week. Just to confirm I am still interested in being on the distribution list for any opportunity to comment on the Water Licence Renewal as a stakeholder representing DND.

Also just to confirm, I was hoping to ask just a few questions for clarification on the consultation process:

- 1) Once DND receives an opportunity to comment, what timeline will DND have to complete their review and submit comments?
- 2) Will public hearings be held? If yes, when and where might they be scheduled? May DND present at these hearings?

If you don't mind, it would be much appreciated if you could also keep Mr. Rod Watson copied. I have cc'd him above.

Sincerely, Laura

Hello Ms. Beaulieu,

I am writing to you on behalf of the Department of National Defence to advise you that the Department of National Defence is interested in remaining a stakeholder in the consultation process for the renewal of Water Licence 1AR-NAN0914, which expires on March 31, 2014.

In recent discussions with Nyrstar Canada Holdings Inc. (representing CanZinco Ltd.), it was brought to our attention that they had an intention of submitting a Water Licence Renewal application to the Nunavut Water Board in November. It is also our understanding that this application for renewal would include a proposed change to the previously approved 'Abandonment and Reclamation Plan, Fuel Tank Farm, Former Nanisivik Mine Site, Nunavut' (Jacques Whitford Stantec Ltd., 2010).

In conversation with Mr. Parsons (AANDC, cc'd above), DND understands that part of the Water Licence Application review process may include two public hearings. DND is interested in information regarding the timing and location of these hearings, as we are interested in participating and the possibility of presenting.

I look forward to any feedback you are able to provide with respect to this process and most specifically when documents related to the Water Licence Renewal application will be made available for review on the Nunavut Water Board public registry, as well as the date and location of the public hearings.

Sincerely,

Laura D'Costa
