Subject: RE: NWB license application 3BC-NEI----
Date: Tuesday, March 20, 2012 11:09:00 AM

Application received. The fees, if being paid by cheque is to be made out to Receiver General for Canada and sent to our office. Once received we will acknowledge and send to Indian Affairs office in Iqaluit. They will issue you with a receipt. Please provide a project area map which identifies the area of your remote camp, the map included is very broad. An NPC conformity and NIRB screening will also be required. If not already requested yourself, please forward your application to both info@nirb.ca and aglukark@npc.nunavut.ca . Please quote file number 3BC-NEI---- on correspondence.
Thank you,

Subject: NWB license application

Dear Phyllis,

In relation to our NRI science licence, please find attached the following documents to apply for a NWB licence:

1. A completed General Water licence application form
2. A completed Remote Camp Questionnaire
3. A summary of our project in English
4. A summary of our project in Inuktitut
5. A Spill Contingency Plan for our field location at Purple Valley, Ellesmere Island

Can you please let me know if you would also like me to mail you hardcopies of the above documents? Can you also let me know the name and address of where I should send the $30 cheques for the application fee and for the water use deposit?

Please also let me know if you have any questions or require any further information.

Regards,
Luke

Subject: RE: Application for Review

Attached is the application form and remote camp questionnaire for your use. Also required will be a spill contingency plan, a brief project summary in English and Inuktitut, a map of the project area and the required fees, 30.00 for admin and usually 30.00 for the water use fee for the minimal use.
Regards,

Hi Phyllis,

Thanks for the clarification. Can you direct me to the NWB license application forms?

Regards,
Luke

Subject: RE: Application for Review

Good morning Luke – until such time as the Nunavut Waters Regulations are approved for use there is a requirement for anyone setting up a remote camp and generating waste to hold a valid water licence. I noted from your application that both a remote camp and fuel storage form part of your project. These two activities trigger the need to apply.
Regards,

Subject: FW: Application for Review

Dear Phyllis,

Mosha Cote asked me to contact you in relation to our recent application for a NRI license for the project 'Northern Ellesmere Ice Shelves, Epishelf Lakes and Climate Impacts'. We have been working on this project since 2008, and have been told previously that we do not require a water license as all of our work is undertaken on ice shelves and sea ice, which overly the ocean. We also draw all of our drinking water supply from the ice shelves. Since these aren't terrestrial water bodies they therefore lie outside of the mandate of the NWB.

Our new license application will continue our existing work, so we believe that we still don't require a NWB license. Can you confirm that this is correct?

Regards,
Luke
