Subject:	RE: 3BC-NTC1012 Sale and Transfers of Fuel Caches (AANDC LUP N2010N0013)
Date:	Wednesday, April 04, 2012 1:40:04 PM
Attachments:	GEM-U_FuelCachesBakerLakeArea20120404.xls

Hello David,

Thanks for the reminder and my apologies for slow response - I should have given you an update before this. Attached is a spreadsheet showing the current status of GEM Uranium fuel caches registered under NWB license 3BC-NTC1012 and AANDC land use permit N2010N0013.

We sold the cache at Arrowhead to Forum Uranium who have paid us an extra deposit that will be refunded once they have removed the fuel and berm from the site. They will add that fuel and berm to their own cache under their own permits. I will be in the area July 15-25 and will inspect the site.

The cache at Amer Lake has not been sold because a new project - Operation GEM led by John Percival - requires that fuel this coming summer. We are adding more fuel to the existing berm as well, under my license 3BC-NTC1012. Our plan is to burn all of that fuel by the end of July and for Ookpik Aviation to remove all of the empties and berm, and clean up the site before August 30, 2012.

The remaining cache under GEM Uranium Licence 3BC-NTC1012 is at Sahara. This fuel will also be used and the empty drums removed with berm by Ookpik before August 31, 2012.

The planned cache mentioned in my email of December 29 at Tehery Lake has yet to be emplaced, will be 18 drums or less and if a license is required it will be set up under the responsible project, not mine.

Please write or call again if you require further information, and please forward this to any parties that you think I may have overlooked.

Subject: FW: 3BC-NTC1012 Sale and Transfers of Fuel Caches

Good afternoon Charlie,

Phyllis Beaulieu has passed your request and the attached information on to me for follow-up. I

was wondering if any progress has been made on the proposed sales and transfers of fuel caches as indicated in your cover email, attached. The Licence issued by the NWB does not specifically address individual caches within the licence terms and conditions, but does however require the spill plan in place to be updated whenever changes are made, sizes, locations etc. The Licence 3BC-NTC1012 was issued for camp operations to support the work and deals with the water use and waste disposal in that respect. If additional caches/sizes/locations are to be made for this coming season, then the Spill plan should be revised accordingly (not necessary if all fuel will be removed entirely). As a note, the remediation of these locations is normally reported through the licence annual reports, however the release of the liability would need to be provided through the land owner and remediation if required.

As a side note, if activity is to extend beyond the expiry date of August 30, 2012, a renewal application should be submitted asap to ensure no interruption in the licence coverage.

If you have any further questions, please feel free to give me a call at my office no. (780) 443-4406 or by this email, dts@nunavutwaterboard.org

Regards,

David Hohnstein
