Subject: Application for Water License
Date: Tuesday, May 29, 2012 9:58:06 AM

Hello Phyllis,

It was very nice speaking with you.

Science North has made application to the NIRB to film the Murres of Akpait this coming August, 2012. The footage filmed will be part of an educational large format (IMAX) film about the Arctic entitled Polar Quest. The NIRB application number is 12YN026.

Science North will have a four man film crew stationed on the shore of Akpait National Wildlife area from August 3, 2012 to August 10, 2012 to undertake filming. The crew will consist of Michael Male - Director of Photography, Dr. Tony Gaston - Scientist, and Joshua Alookie and Jacobie Newkingnak - Location Guides. The crew will set up a base camp that will consist of 1 four man sleeping tent; 2 - two man sleeping tents; a kitchen/common tent for eating, working and equipment storage; a portable Honda 1000i generator or similar for charging batteries and running a laptop computer.

I have downloaded the General Water License Application from your website and have begun filling it in. Please advise if there is anything in addition to this application that the Water Board will require.

Thanks very much.
