Good morning, Arlen,

According to Part G, Item 1 of the Licence terms and conditions, an Abandonment and Restoration (A&R) Plan should be submitted to the Board for approval at least (6) months prior to abandoning any facility under the Licence. In other words, the contractor should provide an A&R Plan that addresses abandonment and restoration activities associated with the existing pump house and any other structure slated for removal. That includes the old intake structure if it is going to be removed as well.

Regards,
Sean

Hello Sean,

The contractor who is to complete the modifications to the water treatment pumphouse in Cambridge Bay has been awarded. As shown in the application, the existing pumphouse will be removed once the new one is constructed. You had mentioned that we should have the contractor provide information regarding the pumphouse demolition.

Can you please provide what remaining info you are looking for from us / contractor?

Regards,

Arlen Foster, E.I.T.
