Subject: Clyde River Licence No. 3BM-CLY0909

Bhabesh,
Further to our discussion this morning, regarding the October 1, 2012 letter from the NWB to the GN, please see attached the most recent correspondence regarding the Clyde River licence and the Plan for Compliance that is required prior to the Board continuing the licence renewal process (Board approval of the Plan). The plan that was submitted, as you will see from the correspondence, was prepared based on the previous licence CLY0308, rather than the current licence CLY0909. I understand that a lot of work went into preparing this plan, however it is not based on the current licence and the conditions contained. I've included the excel spreadsheet that was used as the template for the previous submission, which can be updated to reflect the terms/conditions of the newer CLY0909 licence.

With respect to the question on the overall O&M Manual required under Part F, Item 1, please indicate in your cover letter and the plan for compliance, the issues that you raised regarding the timing of submissions and the difficulty in providing those submissions under the one O&M Manual (ie prepared by different consultants at different times). As I had mentioned, you might consider preparing an overall 'umbrella' document that serves as the O&M Manual with appendices for each of the required plans (ie water, solid waste, sewage, QAQC, etc), or request in the renewal application, that the individual plans be addressed in separate conditions of the licence, allowing approval of individual plans rather than an overall O&M Manual.

Should you require additional information, please do not hesitate to contact myself at ph. 780-443-4406 or email at dts@nunavutwaterboard.org.

Regards,
Dave
