Sounds good Shah. Yes, Phyllis told briefly about NAMA productive meetings. Hopefully, the results will follow..

Thank you Karen for giving me some good news.

We'll follow up the amendment application for new lagoon inclusion- either by myself or by the consultant on behalf of the Hamlet. We are waiting for final inspection and certification by the consultant. Then the As built drawing and O&M manual. Once receive these items, we will forward the amendment application, then follow up the A&R plan for current lagoon. Any repair of correction of the new lagoon work will be within the scope of contractor's warranty period (usually one year from date of completion). So, we are moving forward and expecting improvement in Hamlet compliances. We have very effective discussion at the NAM conference – NWB and AANDC were very positive in open discussion in helping communities. To make these better compliances, we will summarise those non-compliance items for individual Licensee and arrange for bilateral discussion to move forward in solving issues rather than pushing forward. Any long term issues can be resolved with additional resources by the Hamlet and/or GN.

Once again, many thanks NWB for sharing the discussion with Hamlet representative. It would be good if Mayor or council members can be added in the responsibility since they stay more permanent in the community and requires more awareness of budgeting for facility operation.

Subject: RE: Geotechnical Inspection Report for Gjoa Haven Water Licence NWB-3GJO-0409

Good morning Shah,

Thank you for the Geotechnical Inspection report submission. As the renewal licence is pretty much drafted, I believe this report would be reviewed within the Abandonment and Restoration Plan for the Old lagoon once submitted that will be required by the renewal licence.

As I said the Gjoa Haven renewal licence is in final drafting stage, hoping to go for the Board approval by the end of week. Once issued by the Board you will see that it doesn't include the new sewage lagoon info. After discussion with the Board legal counsel it was decided that it would be more appropriate to include it with a separate amendment application. It may be submitted to the Board with the new Sewage Lagoon Construction Summary Report or earlier.

Hi Phyllis and Karen

Please find the attached file of "Final Geotechnical Dam Safety Review" conducted and prepared by EXP consultant. EXP has been retained by GN for helping in compliance to the Municipal Water

Licence. This report is in conjunction to the request by the Board for Licence Renewal/Amendment process.
