Unnusakkut,

This may be beyond the scope of all involved but in the event it is not…wood materials are very expensive and hard to come by especially for a small community of Qikiqtarjuaq. Would it be possible for the proponent to donate the usable materials to the HTO and Rangers of the community?

One method is to bring those materials to a certain site and invite the HTO/Rangers access to those materials or to make other arrangements with the community. If a large part of the material is usable at least 60% may be salvaged thus cutting down on burning of those same materials.
