

Licence 1AR-NAN0914; Type "A"
Renewal- Amendment Application by
CanZinco Ltd. – Nanisivik Mine site
Reclamation Project

Fisheries and Oceans

June 18, 2014

Introduction

- DFO initial technical review focused on Appendices I and J of original application
- CanZinco reverted to current remediation method of soil aeration and bioremediation
- Most of DFO information requests related to alternative remedial approach, which is no longer being pursued
- Current items for discussion
 - Sampling & Reporting
 - MOA between DFO, DND and CanZinco

Sampling & Reporting

- Field sampling and reporting
 - Recommend shift from composite sampling to prescribed distinct confirmatory sampling to support verification of remediation
 - Soil remediation progress reports should be more comprehensive
 - trend analysis of current and historic information
 - more detailed work plans

MOA between DFO, DND and CanZinco

- DFO, DND and CanZinco continue to discuss potential options that will allow both the Department of National Defence Nanisivik Naval Facility construction and the CanZinco remediation to proceed concurrently
