Dear Robert,

Thanks for your message and feedback on the 2022 annual report.

We have reviewed the comments from the ECCC and do not believe that we are able to properly respond to these by the August 18th deadline. This is primarily because of holidays for key company and consulting personnel involved with the Nanisivik water monitoring. We would be thankful if the response deadline could be postponed to mid-September.

Thank you for your consideration and kind regards,

Johan Skoglund
