Landfill Closure Plan

Appendix L

The report entitled West Twin Disposal Closure Plan (Appendix J) is currently being finalized and will follow very shortly. We apologize for this additional delay. Several of the key components of this report however are included in the Talik Investigation Report, the Surface Cell Spillway Report, the Closure Covers Report and the Reclamation and Monitoring Plan – all of which are appended here.

We are hopeful that the enclosed information will enable the Board to facilitate a review of the proposed plans with the ultimate objective of granting an approval for us to proceed with the reclamation. As always we are prepared to work cooperatively with all reviewers toward this goal and look forward to the opportunity to do so.

Please contact me directly if you have any questions or comments regarding the attached.

Yours [sincerely](#),
