Re: Concerns with 3rd and 4th Quarterly Report and Holger Hartmeier's review.

Notes:

I spoke to Carl Mclean about Holger Hartmeier's review of the 3rd and 4th quarterly reports for Polaris Mine. DIAND has concern about the apparent continued subsidence over the former mine workings, about how the concentrate storage shed has been dealt with (covered with only 50 cm of fill) and also about security issues. He is meeting with his staff and he will speak to me later this week. He suggests that a distribution of the reports is a first step to helping make some decisions.

Follow-up Action Required:

Will need to speak to Carl later this week to know about DIAND positions on the various concerns.
