Hi Everyone,

The Nanisivik Project Team would appreciate the opportunity to provide the Nunavut Water Board greater details about the construction of the Naval Facility. We would also like to have a better understanding of the licencing process that will be key to the success of this Government of Canada Northern Infrastructure project. It is our hope that a teleconference will help provide better clarity to everyone.

Please advise if the suggested appointment time will be convenient.

The teleconference call in number is [1-855-322-0802](tel:1-855-322-0802) Participant Access Code 7028942

Thanks,
Tamara

Hi Tamara:

The Nunavut Water Board (NWB or Board) has conducted a preliminary review of your water licence application and supporting information, which the Board received on March 18, 2014.

The review determined that the following information is required before the Board can proceed to the next stages of the licensing process for the application:

4/9/2014

Nunavut Water Board Mail - Fwd: Nanisivik Naval Facility NWB Application Clarification

1. Details pertaining to the proposed fuel storage facility, including capacity, containment areas, and preliminary or for-construction design drawings.
2. Copy of the site-specific Spill Contingency Plan (SCP) developed for the facility
3. Copy of the Abandonment and Restoration Plan (A&RP) developed for the facility

The NWB requests that the above-mentioned information be provided at your earliest convenience so that the Board can continue processing your application.

In the interim, if you have any questions, please contact me at your earliest convenience.

Regards,
Sean
