Attached please find the Water License application, Supplementary questionnaire as well as the Hazardous Materials spill contingency plan and other related documents. As I indicated in our phone conversation as well as by email, I am not able to specify the camp location until a week or two before the commercial caribou harvest begins operation. I cannot decide months in advance to select any campsite —there may not be any caribou in selected locations due to migration patterns etc. The caribou we harvest are wild and their density in certain locations is not predictable.

I will submit original applications by mail along with the application and license fees. I trust this is satisfactory for the moment.

Leonard Netser
