| <input type="checkbox"/> To alter the flow of, or store, water | <input checked="" type="checkbox"/> Other (describe): commercial caribou harvest |
| <input type="checkbox"/> To cross a watercourse | |

7. QUANTITY OF WATER INVOLVED (cubic metres per day including both quantity to be used and quantity to be returned to source)

Water usage is approximately 1000 litres per day. This though is only in full processing, of which would be 12 to 15 days. On storm days, or non working days, approximately 200 litres per day for daily operations. Water usage for harvesting purposes is minimal as the camp floor is snow covered and every day the snow is removed and replaced with clean snow. Sanitization is primarily via hot water sterilization with limited use of sanitizers. Sanitizers used are limited to mild dish detergents and a product called Zep Amine A.

A product description sheet and Material Safety Data Sheet has been attached for the Zep Amine A product.

8. WASTE (for each type of waste describe: composition, quantity (cubic metres per day), methods of treatment and disposal, etc.)

Sewage: collected in honey bags, and disposed of at the Coral Harbour landfill site

Solid waste: wood or similar waste will be disposed at the local landfill in Coral Harbour

Grey Water: will be collected on-site in a plastic drum then transported to the mainland for disposal. The discharge point will be located a minimum of 30 meters from any body of water.

Other: All non-edible condemned portions of the caribou, including viscera, heads (antlers removed) and hides will be transported to a designated area (minimum 800m from camp) to allow for freezing before loading onto Bombardier skids for transport to local community dump. A trench will be dug at the local dump in the spring and all discarded material will be buried in accordance with regulatory requirements.

Land Use Permit

DIAND → ☐ Yes ☐ No If no, date expected: Application submitted and extension granted
 Regional Inuit Association → ☐ Yes ☐ No If no, date expected: Submitted with letter, extension granted
 service fee has been paid. KVRW02J271
 Commissioner ☐ Yes ☐ No If no, date expected: _____

10. PREDICTED ENVIRONMENTAL IMPACTS OF UNDERTAKING AND PROPOSED MITIGATION MEASURES (direct, indirect, cumulative impacts, etc.)

Please see attached project description
 No negative impacts expected

☐ Yes ☒ No If no, date expected _____

11. INUIT WATER RIGHTS

Will the project or activity substantially affect the quality, quantity, or flow of water flowing through Inuit Owned Lands and the rights of Inuit under Article 20 of the Nunavut Land Claims Agreement?

There will be no impacts to the water quality, quantity or flow. KIA has been contacted (Stephen Hartman) and no further negotiations are required.

11. (Continued)

If yes, has the applicant entered into an agreement with the Designated Inuit organization to pay compensation for any loss or damage that may be caused by the alteration. If no compensation agreement has been made, how will compensation be determined?

No compensation required.

12. CONTRACTORS AND SUB-CONTRACTORS (name, address and functions)

This project is community managed, and the people are hired locally.

13. STUDIES UNDERTAKEN TO DATE (list and attach copies of studies, reports, research, etc.)

Government of Nunavut monitors the herd for yearly quotas.
