Subject: Mosher Engineering Limited – Rankin Inlet Power Plan Project – New

## Dear Mr. Losier:

After further review of the application submitted to the Nunavut Water Board (NWB) on April 7, 2006, it has been determined that a Water License is not required for this activity as water use and waste disposal activities, as identified within the Application, are currently authorized through License NWB3GRA0207 held by the Department of Public Works and Services, Government of Nunavut ("GN"). Mosher Engineering Ltd, on behalf of the Rankin Inlet Nunavut Power Corporation, should consider submitting to the GN, with a copy also sent to the Hamlet, a request for use of their water supply and disposal facilities in order to complete the project activity as described.

Please ensure that once you have received this notification, a copy is forwarded to my attention so that I can withdraw this application and close the file.

Sincerely,

## Original signed by:

Phyllis Beaulieu Manager of Licensing
